

# Certificate

## ISO 5501:2014

Certificate number: TINV-ISO55-02      Date first certificate: 29-05-2020  
Date current certificate: 25-08-2023      Date of expiration: 24-08-2026

UMS Group Europe B.V. has determined that the Asset Management System (AMS) used and applied by:

## Transmission Investment Services Limited and Transmission Capital Services Limited

17th Floor, 88 Wood Street, London EC2V, 7DA, GB

meets with the requirements of ISO 55001:2014.

The AMS is applicable for the onshore and offshore substations and cables developed, operated and maintained by TISL/TCSL.

The processes in scope are described in the Integrated Business Management System (IBMS) Manual. The IBMS scope is defined as:

- *Acquiring and managing offshore wind farm connections under the UK's offshore transmission owner ("OFTO") regime,*
- *Project development of offshore electricity assets.*

The "Asset & Quality Management" processes of the IBMS are: Enquiries and Quotations, Preferred Bidder (PB) Stage, Asset Management, Customer Feedback, Development Management and Change Management.

The AMS processes and responsibilities are embedded in the Engineering, Commercial and FAB Link departments, as well as in the management team.
